## 21. Technical Proficiency

I have got training in the recently developed field of Forensic Entomology in the laboratory of Professor Bernard Greenberg, University of Illinois at Chicago, U.S.A. and have been working in this field for the last 22 years. Data about the locally available fauna of Forensic importance has been compiled that can be used in crime investigation. Several cases have already been successfully worked out in collaboration with the local medical college. Besides it, studies on the taxonomy of some insect groups on the basis of morphological and molecular studies is also being undertaken.
